Symbols

Please read the instructions carefully before starting the machine.

CAUTION! WARNING! DANGER!

Always wear goggles when using the machine.

Wear ear protectors!

Wear a suitable dust protection mask.

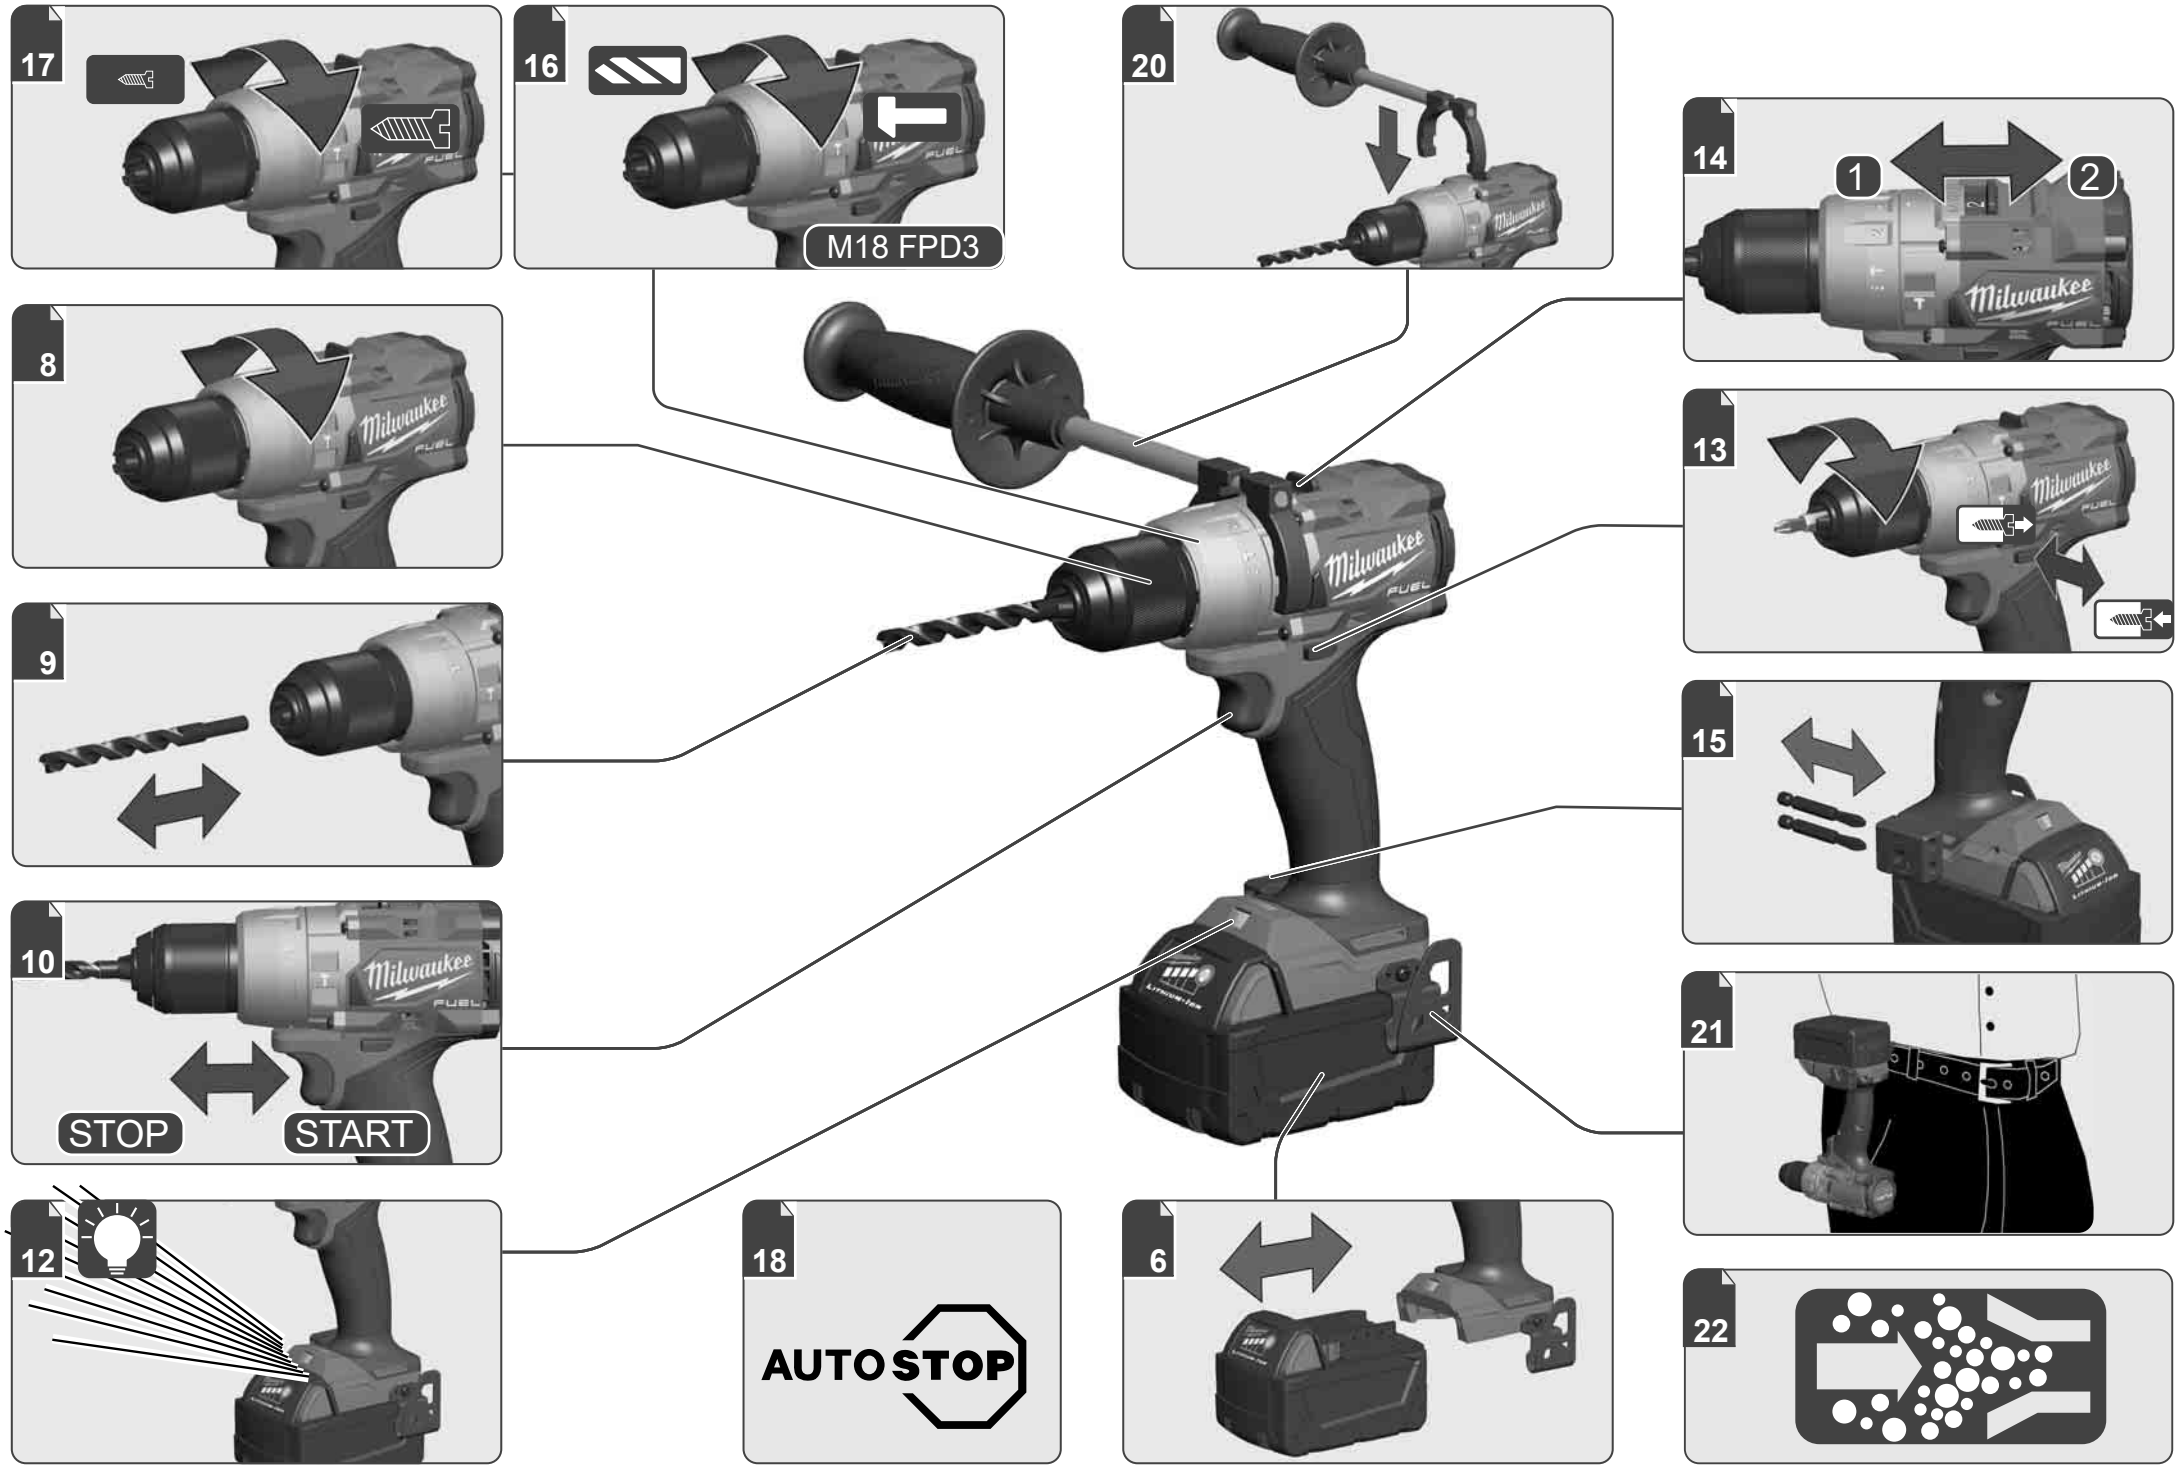

Wear gloves!

Parts or accessories sold separately.

Technical Data

	M18 FDD3	M18 FPD3
Production code	4813 05 02 XXXXXX MJJJJ	4813 14 02 XXXXXX MJJJJ
Voltage battery pack	18 V ⎓	18 V ⎓
No-load speed, 1st gear	0-500 min^{-1}	0-500 min^{-1}
No-load speed, 2nd gear	0-2100 min^{-1}	0-2100 min^{-1}
Impact range, 1st gear	–	0-7800 min^{-1}
Impact range, 2nd gear	–	0-33000 min^{-1}
Torque (5,0 Ah battery)	158,2 Nm	158,2 Nm
Drilling capacity in wood		
with flat bit	38 mm	38 mm
with auger bit	38 mm	38 mm
with hole saw	89 mm	89 mm
with selfeed bit	65 mm	65 mm
Drilling capacity in brick and tile	–	15,88 mm
Wood screws (without pre-drilling)	16 mm	16 mm
Drill chuck range	1,6 – 13 mm	1,6 – 13 mm
Weight according EPTA-Procedure 01/2014 (2.0 Ah ... 12.0 Ah)	1,9...3,1 kg	1,9...3,1 kg
Recommended ambient operating temperature	-18...+50 °C	
Recommended battery types	M18B…; M18HB…; M18FB…	
Recommended charger	M12-18…; M1418…; M18…	
Noise information: Measured values determined according to EN 62841.		
Typically, the A-weighted noise levels of the tool are:		
Sound pressure level / Uncertainty K	98,78 dB(A) / 3 dB(A)	98,78 dB(A) / 3 dB(A)
Sound power level / Uncertainty K	106,78 dB(A) / 3 dB(A)	106,78 dB(A) / 3 dB(A)
Always wear ear protectors!		
Vibration information: Total vibration values (vector sum in the three axes) determined according to EN 62841.		
Vibration emission value a_h / Uncertainty K		
Impact drilling into concrete	–	11,3 m/s^2 / 1,5m/s^2
Drilling into metal	1,85 m/s^2 / 1,5 m/s^2	1,85 m/s^2 / 1,5m/s^2
Screwing	1,48 m/s^2 / 1,5m/s^2	1,48 m/s^2 / 1,5 m/s^2

Accessory - Not included in standard equipment.

Connect the machine to a suitable dust extractor.

ENGLISH

WARNING Read all safety warnings, instructions, illustrations and specifications provided with this power tool. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

WARNING The vibration and noise emission level given in this information sheet has been measured in accordance with a standardized test given in EN 62841 and may be used to compare one tool with another. It may be used for a preliminary assessment of exposure.

The declared vibration and noise emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or poorly maintained, the vibration and noise emission may differ. This may significantly increase the exposure level over the total working period.

An estimation of the level of exposure to vibration and noise should also take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period.

Identify additional safety measures to protect the operator from the effects of vibration and/or noise such as: maintain the tool and the accessories, keep the hands warm, organization of work patterns.

TYPE

M18 FDD3 Cordless Drill Driver
M18 FPD3 Cordless percussion drill/driver

DRILL SAFETY WARNINGS

Safety instructions for all operations

Wear ear protectors when impact drilling. Exposure to noise can cause hearing loss.

Use auxiliary handle(s). Loss of control can cause personal injury.

Brace the tool properly before use. This tool produces a high output torque and without properly bracing the tool during operation, loss of control may occur resulting in personal injury.

Safety instructions when using long drill bits

Never operate at higher speed than the maximum speed rated of the drill bit. At higher speeds, the bit is likely to bend if allowed to rotate freely without contacting the workpiece, resulting the personal injury.

Always start drilling at low speed and with the bit tip in contact with the workpiece. At higher speeds, the bit is likely to bend if allowed to rotate freely without contacting the workpiece, resulting the personal injury.

Apply pressure only in direct line with the bit and do not apply excessive pressure. Bits can bend causing breakage or loss of control, resulting in personal injury.

Hold the power tool by insulated gripping surfaces, when performing an operation where the cutting accessory or fasteners may contact hidden wiring. Cutting accessory or fasteners contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.

ADDITIONAL SAFETY AND WORKING INSTRUCTIONS

Do not reach into the machine while it is running.

The insertion tool is sharp-edged and can become hot during use.

WARNING! Danger of cuts and burns
- when handling the insertion tools
- when setting the device down.

Chips and splinters must not be removed while the machine is running.

When working in walls ceiling, or floor, take care to avoid electric cables and gas or waterpipes.

Clamp your workpiece with a clamping device. Unclamped workpieces can cause severe injury and damage.

Remove the battery pack before starting any work on the machine.

Do not dispose of used battery packs in the household refuse or by burning them. Milwaukee Distributors offer to retrieve old batteries to protect our environment.

Do not store the battery pack together with metal objects (short circuit risk).

Use only compatible Milwaukee chargers from the same battery platform for charging batteries. Do not use batteries from other systems.

ALWAYS USE A SIDE HANDLE when using a 9.0 Ah or higher capacity battery pack; the output torque of some tools may increase. If your drill/driver did not come with a side handle, use the spare part side handle (see explosion drawing of the tool).

Do not insert the bit on the tool when the tool is running, and switch is lock on status, the bit will be running and may hurt the user.

Warning! To reduce the risk of fire, personal injury, and product damage due to a short circuit, never immerse your tool, battery pack or charger in fluid or allow a fluid to flow inside them. Corrosive or conductive fluids, such as seawater, certain industrial chemicals, and bleach or bleach containing products, etc., can cause a short circuit.

SPECIFIED CONDITIONS OF USE

M18FDD3: The battery drill/screwdriver may be used for drilling and screwdriving for independent use away from mains supply.

M18 FPD3: The electronic battery percussion drill/screwdriver is designed for drilling, percussion drilling, as well as screwdriving for independent use away from mains supply.

Do not use this product in any other way as stated for normal use.

NOTES FOR LI-ION BATTERIES

Use of Li-Ion batteries

Batteries which have not been used for some time should be recharged before use.

Temperatures in excess of 50°C (122°F) reduce the performance of the battery. Avoid extended exposure to heat or sunshine (risk of overheating).

The contacts of chargers and battery packs must be kept clean.

For an optimum life-time, the batteries have to be fully charged, after used.

To obtain the longest possible battery life remove the battery pack from the charger once it is fully charged.

For battery storage longer than 30 days:
Store the battery where the temperature is below 27°C and away from moisture.
Store the battery in a 30% - 50% charged condition.
Every six months of storage, charge the battery as normal.

Battery protection for Li-Ion batteries

In extremely high torque, binding, stalling and short circuit situations that cause high current draw, the tool will vibrate for about 5 seconds, the fuel gauge will flash,and then the tool will turn OFF. To reset, release the trigger.
Under extreme circumstances, the internal temperatur of the battery could become to high. If this happens, the fuel gauge will flash and the battery pack cool and then continue work.

Transport of Li-Ion batteries

Lithium-ion batteries are subject to the Dangerous Goods Legislation requirements.

Transportation of those batteries has to be done in accordance with local, national and international provisions and regulations.

- The user can transport the batteries by road without further requirements.
- Commercial transport of Lithium-Ion batteries by third parties is subject to Dangerous Goods regulations. Transport preparation and transport are exclusively to be carried out by appropriately trained persons and the process has to be accompanied by corresponding experts.

When transporting batteries:

- Ensure that battery contact terminals are protected and insulated to prevent short circuit.
- Ensure that battery pack is secured against movement within packaging.
- Do not transport batteries that are cracked or leak.

Check with forwarding company for further advice

AUTOSTOP

AUTOSTOP The AUTOSTOP™ kickback feature senses a bind of the drill. The control lamp flashes and the electronic switches off the machine. To switch on, release the trigger and press it again.

CLEANING

The ventilation slots of the machine must be kept clear at all times.

MAINTENANCE

Use only Milwaukee accessories and Milwaukee spare parts. Should components need to be replaced which have not been described, please contact one of our Milwaukee service agents (see our list of guarantee/service addresses).

If needed, an exploded view of the tool can be ordered. Please state the machine type printed as well as the six-digit No. on the label and order the drawing at your local service agents or directly at: Techtronic Industries GmbH, Max-Eyth-Straße 10, 71364 Winnenden, Germany.

DISPOSAL

Do not dispose of waste batteries, waste electrical and electronic equipment as unsorted municipal waste. Waste batteries and waste electrical and electronic equipment must be collected separately.
Waste batteries, waste accumulators and light sources have to be removed from equipment.
Check with your local authority or retailer for recycling advice and collection point.
According to local regulations retailers may have an obligation to take back waste batteries and Waste electrical and electronic equipment free of charge.
Your contribution to re-use and recycling of waste batteries and waste electrical and electronic equipment helps to reduce the demand of raw materials.
Waste batteries, in particular containing lithium and waste Electrical and electronic equipment contain valuable, recyclable materials, which can adversely impact the environment and the human health, if not disposed of in an environmentally compatible manner.
Delete personal data from waste equipment, if any.

EC DECLARATION OF CONFORMITY

We declare as the manufacturer under our sole responsibility that the product described under "Technical Data" fulfills all the relevant regulations and directives listed below and that the following harmonized standards have been used.
